## 1 End-User Pricing Tables

Table 1 End-User Service Pricing – Post-Paid and Table 2 End-User Service Pricing – Pre-Paid represent indicative pricing to public safety users. When completing the tables, the Offeror shall take into account any assumptions used in determining indicative pricing, such as details on usage caps, roaming caps, throttling, and contract length. Additionally, the Offeror shall indicate the proposed volume discount schedule and special pricing mechanisms to support public safety adoption and use of the Nationwide Public Safety Broadband Network. The Offeror shall use Table 3 Public Safety Devices and Estimated Price Points to identify the anticipated supplier and estimated price points for Band 14-enabled devices for public safety.
